ADJUSTING THE TIME

PREMIÈRE FLYING TOURBILLON

For the 25th anniversary of its first watch creation, with an octagonal shape inspired by the N°5 bottle-stopper and Place Vendôme, CHANEL offers women the opportunity to enter the world of watchmaking's high mechanical complications. This feminine foray into the complexities of watchmaking should be as mysterious as it is beautiful and poetic.

This Flying Tourbillon takes the shape of a stylized camelia, Mademoiselle Chanel's favourite flower, and discreetly beats away, almost as if in secret at the heart of this Première watch. With no upper bridge, the cage is decorated with a camelia that appears to rotate weightlessly above it.

The development of this exceptional tourbillon is the fruit of a collaboration between CHANEL and Renaud et Papi (APRP SA) Swiss master watchmakers, constructors and engineers - an advanced research and development division of Audemars Piguet. This complication is a first for both houses.

"CAMELIA FLYING TOURBILLON" CALIBRE

- Manual winding mechanical movement
- 40 hour power reserve
- Number of parts: 225
- Components: chamfered, stretched, and circular grained by hand
- Number of rubies: 18
- Flying Tourbillon: 73 components - carriage weight: 0.432 g
- Frequency: 21'600 vibrations / hour (3 Hz)
- Motor unit: 1 fixed clamp barrel
- Spring torque: 720 g.mm
- Custom designed rectangular bottom plate
- Shockproof system on the balance
- Balance with variable inertia moment

ADJUSTING THE TIME

ADJUSTMENTS

Setting the time

Crown C is normally placed in position 1. Pull the crown out one notch (position 2), turn to move the hands to the desired time. Remember to push the crown back fully to return it to its original position.

Manual winding

This watch offers a 40-hour power reserve after which it is necessary to rewind it manually. Wind the crown in a clockwise direction (position 1) until resistance is felt. This resistance indicates that the movement is completely rewound. It is important never to force when winding.

- A - Hours hand
- B - Minutes hand
- C - Crown
